

The UK's suicidal Rosebank decision – Scotland needs a stronger response

Rishi Sunak's scandalous decision to go ahead with the exploitation of the Rosebank oil and gas field, alongside Keir Starmer's cringe-worthy non-response – 'yes, we're opposed but no, we won't do anything about it' – has left the Scottish government and the SNP with an open goal. Unfortunately, Humza Yousaf and his Net Zero and Just Transition minister, Mairi McAllan, are being so careful not to blast the ball over the bar, they seem reluctant to kick it at all.

The desire seems to be there, sort of. After weeks of edging himself off the fence on the issue, the First Minister did say this was the wrong decision. Mairi McAllan said the same. The Scottish government's Energy Secretary, Neil Gray, said, rather tamely, that the SNP administration was "disappointed" while pointing out, correctly, that Rosebank would not contribute to 'energy security', as most of the oil produced would be sold abroad. In fact, Equinor, the Norwegian state oil company that has been given the go-ahead to exploit Rosebank, was more forceful in its dismissal of the bogus argument about energy security used by the Tory government in London and the oil lobby in Scotland. It said if the UK wanted any of the oil it plans to extract from Rosebank, it would have to buy it on the open world market.

The sound of opposition from SNP ministers is a lot weaker than that coming from Caroline Lucas, still the only Green MP in Westminster, who called it "morally obscene" and "a climate crime", or from the Scottish Green Party, the SNP's partner in the Scottish government, whose spokesman, Mark Ruskell, called it an "utter catastrophe" that showed "total contempt for our environment and future generations".

The day after the announcement, Mairi McAllan told the BBC's Good Morning Scotland that the Scottish government had had "long-standing concerns" about Rosebank and had been "calling for a very strict climate compatibility test, an evidence-led test, to be applied". When quizzed on what evidence was needed, she said there were a series of things that needed to be evaluated: firstly, whether it was in line with both Scotland and the UK's climate commitments, including to the Paris Agreement and its goal of keeping global warming within 1.5 degrees Celsius; but also to things like energy security and the rights of workers in the northeast of Scotland.

We may agree these are vital concerns (although what exactly was meant by energy security could be controversial). However, insisting on them now seems pointless, unless it is just a rhetorical device to avoid saying clearly that no oil or gas should be extracted from Rosebank, or any other new field in the North Sea or elsewhere. We already know because we have been told, endlessly, by the scientists of the UN's IPCC, by the International Energy Agency, and by Antonio Guterres himself, not to mention the climate justice movement across the world and thousands of representatives and experts from the Global South, that staying within the 1.5 limit is simply incompatible with any new oil or coal extraction, and that we also have to phase out, rapidly, the wells and mines that are currently operating.

Most recently and conclusively, we have also been told by the very oil company responsible (as we mentioned before) that Rosebank and any other new North Sea fossil fuel production will contribute more or less zero to any kind of energy security. And although there are many, justified fears among workers in the northeast, oil workers themselves have told researchers that they want to be involved in a just transition away from fossil fuels. Some of them have begun to push for that themselves and to design what it might look like, through the important Our Power campaign.

The SNP government's problem is that it feels unable, or unwilling, to confront the oil lobbies or its right wing. It's unclear if the suspension of the right-wing, anti-Green, anti-woke MSP, Fergus Ewing, might signal a small shift in this respect. But the roots of such reluctance run deeper. They flow from the party's history and its character – as a nationalist party caught between its genuine, social democratic desire to build a fairer, more decent country, that seeks to combat poverty and exclusion at home and deal decently with migrants, the Global South and the planet, and its refusal to challenge or even query the iron laws of the market economy. The latter is cemented by its yearning to become a junior outpost of the supposedly progressive, European capitalist class.

This has been accentuated since the bruising leadership campaign at the beginning of the year, when Kate Forbes' explicitly right-wing, business-first, climate-light campaign came within a whisper of beating Humza Yousaf as bearer of the legacy of former First Minister, Nicola Sturgeon.

The police investigation into the party's accounts a few weeks later, with the formal questioning of Sturgeon's husband and then herself, drove the process further. Whatever the reality, if any, behind the case, it was certainly used to try to discredit the SNP as a whole and to push the new Yousaf administration to the right.

Ironically, the central target of that campaign, Nicola Sturgeon herself, has come out more strongly against the Rosebank go-ahead than her proteges. She tweeted her agreement with Caroline Lucas calling the approval an act of environmental vandalism, and saying risks slowing the green transition that oil and gas workers need to happen at pace.

The fact is that a sizeable majority of people in Scotland want their government to take urgent action to combat climate change. And despite its constrained powers under devolution,

there is a lot it can do too. Taking a clear, unequivocal stand against Rosebank and any other new fossil fuel projects in the North Sea would be a start. It would be one way of marking a clear difference with the pusillanimous position of Starmer's Labour leadership and might even help win the crucial Rutherglen election.

More strategically, that stance against any new oil and gas needs to be clearly stated in the Scottish government's long-overdue response to the public consultation on its seriously inadequate Draft Energy Strategy and Just Transition Plan, and built into its new Climate Change Plan, due to be published in November.

It should look at how it can use its existing powers – in areas like planning, transport, and health – to wage a guerrilla campaign against the implementation of new fossil fuel extraction.

And it could put in serious doubt the long-term viability of investments like those of Equinor, if it promised that any government of an independent Scotland would make a priority of nationalising and closing down Rosebank and any other new fields, without compensation.

Such bold action may seem unlikely, unless there is some serious pressure pushing in this direction.

We could all take courage from the historic success of the *Yes to Yasuni* campaign in Ecuador, led by environmentalists and the powerful Indigenous movement, which persuaded nearly 60% of the population to vote in August in favour of mandating their government to leave the oil in the soil beneath the mega-diverse Amazonian rainforest.

Rising Clyde: Cumbrian Coal – leave it in the ground

This month's Rising Clyde programme is about the protest movement against the proposed coal mine in West Cumbria with a discussion with Cumbrian climate justice activist, [Allan Todd](#), and interviews with Cumbrian activists at the 'speakers' corner' events against the coal mine.

Rising Clyde is the Scottish Climate Show, presented by Iain Bruce, and broadcast on the Independence Live Channel. Previous editions can be found in the embedded video above, Episode 14, by clicking in the three lines in the top right hand corner and choosing from the video list.

*Allan Todd is a climate and anti-fascist activist, and has been active with Greenpeace and XR. He participated in the anti-fracking protests at Preston New Road in Lancashire, where he organised the 'Green Mondays' from 2017 to 2019. Allan is a member of [Anti-Capitalist Resistance](#) and of Left Unity's National Council. He is the author of *Revolutions 1789-1917* (CUP) and *Trotsky: The Passionate Revolutionary* (Pen & Sword). His next book is *Che Guevara: The Romantic**

Revolutionary.

The host of Rising Clyde, Iain Bruce, is a journalist, film maker and writer living in Glasgow. Iain has worked for many years in Latin America. He has worked at the BBC and Al Jazeera, and was head of news at teleSUR. He has written books about radical politics in Brazil and Venezuela. During COP26, he was the producer and co-presenter of Inside Outside, a daily video briefing for the COP26 Coalition.

‘Tsunami’ of industrial action to hit oil and gas operators as 1400 offshore workers set to strike – from Unite the Union

From [Unite the Union](#):

Dozens of platforms in UKCS set to be brought to a ‘standstill’ with BP, Shell and Total hit

Unite the union announced today (Monday 20 March) that major oil and gas operators in the UK Continental Shelf (UKCS) face a ‘tsunami’ of industrial unrest within weeks as around 1400 offshore workers across five companies demand a better deal on jobs, pay and conditions.

Unite, whose members will take action at companies enjoying record-busting profits, predicts that platforms and offshore installations will be brought to a ‘standstill’ due to the

specialised roles its members undertake.

The action will hit major oil and gas operators including BP, CNRI, EnQuest, Harbour, Ithaca, Shell and Total.

Unite general secretary Sharon Graham said: "Oil and gas companies have been given free rein to enjoy massive windfall profits in the North Sea; drilling concessions are effectively licences to print money.

"1400 offshore workers are now set to take strike action against these employers who are raking it but refusing to give them a fair share of the pie. This will create a tsunami of industrial unrest in the offshore sector.

"Unite will support these members every step of the way in their fight for better jobs, pay and conditions."

The prospective action includes electrical, production and mechanical technicians in addition to deck crew, scaffolders crane operators, pipefitters, platers, and riggers working for Bilfinger UK Limited, Stork construction, Petrofac Facilities Management, the Wood Group UK Limited and Sparrows Offshore Services.

John Boland, Unite industrial officer, added: "Unite has received unprecedented support in favour of industrial action in the UK Continental Shelf. It is the biggest mandate we have received in a generation in the offshore sector. There is no doubt that this is directly linked to oil and gas companies reaping record profits while the workforce gets scraps from the table.

"Unite's members are angry at the corporate greed being shown by offshore operators and contractors. Now these major global companies are set to face the consequences as dozens of offshore platforms will be brought to a standstill in a matter of weeks."

Details of the disputes

Around 700 offshore workers at Bilfinger UK Limited are set to down tools after Unite members voted in favour of taking industrial action as part of a pay dispute. Bilfinger workers are demanding an increase above the base rate of pay set in the Energy Services Agreement (ESA) for 2022.

Meanwhile, 350 Stork construction workers are set to take strike action after Unite members also supported industrial action in a dispute over working rotas and rates of pay.

Unite members employed by Petrofac Facilities Management Limited on the FPF1 platform also voted in favour of strike action. Around 50 workers are involved in the dispute over holiday entitlements. Offshore workers can be asked to work at any time for no additional payment. The operator, Ithaca Energy, has a 'clawback' policy of 14 days, double the industry norm of 7 days.

Unite members employed by the Wood Group UK Limited on TAQA platforms similarly voted to take strike action. Around 80 members are involved in the dispute which is focused on a 10 per cent cut made to salaries in 2015 worth around £7,000 a year.

The mandates for industrial action follow the recent announcement by Unite that around 200 Sparrows Offshore Services workers will take strike action across more than 20 oil and gas platforms in disputes over pay. Strike action is set to hit various platforms from 29 March and until 7 June in a series of 24, 48 and 72-hour stoppages. This action will hit a number of major operators including BP, Shell, Apache and Harbour Energy.

A further two industrial action ballots are due this week at Petrofac BP involving around 80 workers (21 March), and at Worley Services UK Limited on Harbour Energy platforms involving around 50 workers (24 March) in disputes over pay.

The pending ballot results could bring the final total to around 1500 offshore workers taking industrial action.

Unite [recently blasted](#) the UK Government's inaction on taxing oil firms as BP posted the biggest profits in its history as it doubled to £23 billion in 2022. BP's bonanza profits come after Shell reports earnings of £32 billion, bringing the combined total profits of the top two energy companies in Britain to a record £55 billion.

ENDS

Notes to Editors:

Ballot results in full

- 1. Bilfinger – Yes to strike action – 97%*
- 2. Stork – Yes to strike action – 98%*
- 3. Petrofac Facilities Management Limited – Yes to strike action – 100%*
- 4. Wood Group UK Limited – Yes to strike action – 93%*

Our Power: Offshore workers

demands for a just energy transition

An important new report from [Friends of the Earth Scotland](#).

Over the past two years, we've come together with offshore workers to build demands for a just energy transition. These workers developed 10 demands covering training and skills, pay, job creation, investment and public ownership.

We surveyed over 1000 additional offshore workers and over 90% agreed with these demands. This plan is comprehensive in scope, transformative in scale and deliverable now.

Below you will find a series of resources setting out the demands and the paths we can take to turn them into reality.

We need a rapid transition away from oil and gas that protects workers, communities and the climate. But the government has no plan to phase out oil and gas production in the North Sea.

Oil and gas workers are ready to lead a just transition away from oil and gas, but they are caught in a trap of exploitation and fear created by oil and gas companies. Working conditions are plummeting, just as profits, prices and temperatures are soaring.

The UK and Scottish Governments must listen to workers to make this transition work for all of us. These demands lay out a comprehensive plan, which includes:

Removing barriers that make it harder for oil and gas workers to move into the renewable industry.

Ensuring safety, job security and fair pay across the energy industry.

Sharing the benefits of our energy system fairly, with public

investment in energy companies and communities.

*Workers have told us what they need for a just transition,
now we need to work with them to make it happen.*

Hear from workers

Our Power: Offshore workers' demands for a just energy transition

The [‘Our Power’ report](#) is a blueprint for a just transition in the UK North Sea.
